CLAIMS

What is claimed is:

- 1. A laptop computer comprising:
- 5 a first display; and
 - a second display attachable to the first display, wherein the second display comprises a touch-sensitive display.
- The computer of claim 1, wherein the second display is rotatably
 attachable to the first display.
 - 3. The computer of claim 1, wherein the second display displays a user-interface.
- 15 4. The computer of claim 3, wherein the user-interface comprises a keyboard.
 - 5. The computer of claim 3, wherein the user-interface comprises a pointing device.

20

6. The computer of claim 3, wherein the user-interface is reconfigurable in accordance with instruction from a software application being executed on the laptop computer.

YOR920030362US1

- 7. The computer of claim 1, wherein the first display comprises a touch-sensitive display.
- 8. A method of driving a laptop computer having a first display attachable to a second display that is touch-sensitive, the method comprising:

 displaying a user-interface on the second display; and receiving an input from the user-interface.
- 10 9. The method of claim 8, wherein the first display is rotatably attachable to the second display.
 - 10. The method of claim 8, wherein the user-interface comprises a keyboard.

15

- 11. The method of claim 10, further comprising reconfiguring the user-interface.
- 12. The method of claim 11, wherein reconfiguring the user-interfacecomprises reconfiguring the user-interface in response to an application state.
 - 13. The method of claim 11, wherein reconfiguring the user-interface comprises reconfiguring the user-interface in response to a user preference.

YOR920030362US1

- 14. The method of claim 11, wherein reconfiguring the user-interface comprises reconfiguring the user-interface in response to a user instruction.
- The method of claim 11, wherein reconfiguring the user-interface comprises one of changing the size of the user-interface, changing the location of the user-interface, moving a key within the user-interface, removing a key from the user-interface, changing a label on a key on the user-interface, and changing a color of a key on the user-interface.

10

20

- 16. The method of claim 8, further comprising displaying a hot key that triggers the execution of a plurality of instructions in accordance with a state of the laptop computer.
- 15 17. The method of claim 8, further comprising displaying an application result.
 - 18. The method of claim 17, wherein displaying an application result comprises displaying a first page of an electronic book on one of the first display and the second display.

- 19. The method of claim 18, wherein the displaying of the application result further comprises displaying a second page of an electronic book on the other one of the first display and the second display.
- 5 20. The method of claim 8, further comprising displaying a drop-down menu on the second display.
 - 21. The method of claim 8, wherein displaying the keyboard comprises displaying a color-coded keyboard.

10

20

- 22. A signal-bearing medium tangibly embodying a program of machine-readable instructions executable by a digital processor for driving a laptop computer having a first display attachable to a second display that is touch-sensitive apparatus, the program comprising:
- instructions for displaying a user-interface on the second display; and instructions for receiving an input from the user-interface.
 - 23. A laptop computer comprising:

a first display;

a second display that is touch sensitive and attached to the first display;

means for displaying a user-interface on the second display; and means for receiving an input from the user-interface

YOR920030362US1

24. A method of providing a display for a laptop computer, the method comprising:

providing a first display; and

- providing a second display attachable to the first display, wherein the second display comprises a touch-sensitive display.
 - 25. A laptop computer comprising:

a first display; and

a second display attachable to the first display, wherein the second display comprises a customizable user-interface.
